

In India, most of the parents who visit Dental clinics with their children also require treatment. There is tremendous growth in the field of Dentistry and the future is very promising!

The rates mentioned in the website are for basic materials used while treating the patient. These rates are to assure the patient that Dental treatment is not expensive,(the most common reason every Dentist is familiar with patients for not showing up). Doctors can show patients more options about various new materials used in Dentistry and convince them for treatment. The mission is to make sure every patient leaves the Dental clinic with a smile!

One Dentist cannot treat all patients! Hence it becomes impossible to achieve a "zero-patient-rejection" rate in the country. In order to achieve this goal, all Dental Practitioners must come together and provide the best care and counselling to their patients.

For the first time in India, Dental clinics will be more organised and Dental Practitioners will also see an exponential rise in their income!

India is a developing country and the population needs greater impetus on Oral care.

Patients from every corner of the country will seek your services 24/7.

Foreigners/NRIs visiting the country will also seek your services!

Foreigners will be the new experience for many Doctors. Dentists are requested to sharpen their skills in order to enjoy unlimited cases!

With all the Dentists participation, Dantalaya aims to make the country proud by becoming the most "sought-after" destination for Dental care in the world!

People from all walks of life will visit Dental clinics for treatment. All Doctors must treat everyone fairly and encourage good oral habits in their patients.

Dental lab proprietors have also agreed upon FIXED CHARGES for all Dental clinics to make sure the Practitioners do not feel the burden.

Doctors will be eligible for personal loans to upgrade their setups.

Doctors will be intimated by email about new initiatives!
